

PROJECT PROFILE: A1 Safe Access to Structures

Location	A1(M), Stevenage Hertfordshire
Client	Highways Authority
Principal contractor	Carillion WSP
Value	£40,000
Duration	4 weeks
Quantities	4 platforms to 2 bridges alongside main dual carriage way
Scope of Work	<p>This contract saw us install what are essentially inspection platforms to the under side of two bridges (but a total of four platforms) on the A1 carriage way, close to Stevenage in Hertfordshire.</p> <p>From these platforms, qualified personnel can perform safety inspections to the bearing of the bridges, without the concern of the person performing the inspection slipping down the embankment and potentially into live traffic.</p> <p>Working hand in hand with the platform systems designers, saw this project come in on time and on budget.</p>
